6 Processes

4 IN 1

1 - COMBINED FILTER

PP + CARBON + ANTI-SCALE + POST-CARBON

This filtration system removes sediment, corrosion, chlorine, and solid particles from the water, ensuring a cleaner and safer supply. It also reduces unwanted odors and tastes, significantly improving water quality.

In addition, it protects equipment components, helping to prevent damage and extending their useful life.

2 IN 1

2 - MULTIFUNCTION MEMBRANE

HIGH EFFICIENCY

Removes organic compounds and microorganisms present in the water, ensuring a cleaner, safer, and higher quality supply.

ADVANCED FILTRATION, GUARANTEED RELIABILITY
