

# THE DRINKING REVOLUTION

runbött

## The drinking revolution

More than 200 kg of garbage is disposed of every second in the sea and the ocean.

80% of this garbage is plastic and derivatives that can take up to 1000 years to decompose affecting seriously all marine life and, therefore, to us.

**It's time for a revolution**, to change our habits and to improve our world.

RUNBOTT is a reusable container made of materials of premium quality which, apart from keeping your drinks at the right temperature for hours, it will not leave bad tastes or smells. It is easy to clean and you will also help to reduce waste.

Thank you for joining the **RUNBOTT drinking revolution**.

## Ceramic coating inside

RUNBOTT's secret is the inner ceramic coating that allows to maintain the temperature of our drink for hours without exposing it to metal, thus avoiding unpleasant tastes or smells.

In addition, it is very easy to clean. A little tap water is enough and you will have your RUNBOTT ready for a new adventure.

## Double wall insulation

RUNBOTT has a double wall of stainless steel with thermic insulation. This maintains the temperature of your drinks for a long time.

We guarantee that you can have your iced tea for a whole day or keep your soup warm for up to 12 hours.

## Non-slip base

It is also important that our products have a firm base to avoid accidents.

Involuntary accidents are frequent at work, or excursions.

The textured round silicone base performs this function silently to leave a firm and secure sensation when supporting the bottle.

## Color explosion

Eight RUNBOTT models and more than 25 different colors!

You can be sure you'll find your favorite thermos bottle among this explosion of colors.

## And customize it!

We can customize your RUNBOTT in many different ways. A single bottle or thousands of them.

No problem! We do it using the latest technology in laser engraving.

Make your bottles unique by putting your name, the logo of your company or the crest of your favorite team.

Make it yours!

## Infuser Cap

971793

Prepare your favorite infusions with the lid with filter for Runbott Sport 60 and Sport 35. Unscrewable, washable and with a carrying handle.

## Neoprene bag

970320

You have no excuse not to take your Runbott with you everywhere. Our neoprene cover is perfect for you to transport your bottle and protects it from bumps and scratches. Its strap is adjustable so that you can adapt it as you want.

## Cylindrical box

971240

An ecological and resistant pack for individual bottles. Ideal for gifts or transporting without risk of damaging the bottle. It offers a wide surface for labeling without the edge limits of conventional boxes.

## City cap

971650

Cap for the Runbott City, unscrewable and washable. With metal and plastic parts, silicone decoration, and a rubber closure that makes it airtight and helps maintain temperature.

## Sports cap

970421

Turn your Runbott into a sports bottle to take it to the gym, to the mountains or to the beach. With the silicone mouthpiece, replacement straws for greater durability and ergonomic lateral grip prepared for hanging and carrying more comfortably.

## Cup cap

971611

Plastic screw cap with dispenser, it has an airtight rubber, it does not leak, it does not condense humidity and it maintains the temperature.

## Standar cap

970477

Plastic screw cap with hermetic rubber, it does not leak, does not condense humidity and maintains the temperature. It has a practical rubber band, unbreakable and useful to carry or hang from your backpack.
